

Sentinel Protection Installer Version 7.5.0 – Release Notes

This document contains information on new features, supported/unsupported platforms, and enhancements and problems corrected in Sentinel™ Protection Installer version 7.5.0 release.

Product Overview

Sentinel Protection Installer is an integrated installer of the Sentinel System Driver, Sentinel Protection Server, and Sentinel Keys Server. Sentinel System Driver is required for communicating with the Sentinel keys on Windows platforms.

What's New in This Release?

This section provides information about the new features and problems corrected in this release.

New Features in This Release

Enhanced Sentinel System Driver

Sentinel System Driver has been updated in this release to support disable device sharing option.

Enhanced Sentinel Protection Server

Sentinel Protection Server has been updated to support Secure Communication Tunnel and Disable Device Sharing features.

Known Issues

- Standard users cannot uninstall Sentinel Protection Installer from the Control Panel using the **Uninstall** option on Windows Vista (32-bit) systems. It is recommended that the standard users should select **Change** and subsequently select **Remove** from **Program Maintenance** dialog of Sentinel Protection Installer to perform uninstallation on Windows Vista (32-bit) system.

Enhancements and Problems Corrected in This Release

The following issues have been fixed in this release:

- Earlier, SPI 7.4 was not passing the validations of Vista Quality validation suite. This issue has been resolved in this release.
- Earlier, three errors were included in the Event Log while installing Sentinel Protection Installer version 7.4.2 on a Vista machine. This issue has been resolved in this release.
